

■ Advanced Portfolio with 3D Animations

If you want to level up your portfolio with modern animations and 3D elements, libraries like Three.js and Framer Motion are great tools. Here are some starting resources to help you get practical experience.

■ ■ Tools to Use

- 1 **Three.js** – Add 3D objects, interactive animations, and immersive visuals in the browser.
- 2 **Framer Motion** – Powerful animation library for React, great for smooth UI/UX transitions.

■ Learning Resources

- 1 **FreeCodeCamp Video** – Full tutorials on advanced React portfolios and 3D/Framer Motion animations. Search on YouTube for *'FreeCodeCamp Portfolio Three.js'*.
- 2 **GitHub** – Explore open-source portfolios with Three.js and Framer Motion. Search for repositories tagged *'threejs portfolio'* or *'framer motion portfolio'*.

■ Next Steps

- 1 Start with a basic React app using Vite or Create React App.
- 2 Integrate Framer Motion for smooth page transitions and animated components.
- 3 Add Three.js or React Three Fiber for 3D models, background effects, or interactive product showcases.
- 4 Host your portfolio on GitHub Pages, Netlify, or Vercel.
